PRESIDENT AND PEOPLE.

THE TEST OF THE NATION'S FAITH. To the Editor of The Tribune.

SIR: Human sympathy and professional skill have do.e their very best to save "the Nation's patient," and now, within the very shadow of the dark valley, oppressed, bewildered, disheartened, we find ourselves well-nigh hopelessly saying, "We can do no mor ." But the very thought quickens us again, and with it comes the almost reproachful question, "Have we unitedly done the vital thing? Have we tested by importunate prayer the love and the healing power of an emmipotent God? "Who shall say that this heartrend ing suffering in the White House is not the crucial test ing suffering in the White House is not the crucial test of the Nation's faith in a living Ged, who is able beyond all that we ask or think to answer our supplications? The noble, faith'ul corps of physicians have done and are doing all in their power to save the precious life. Now let the Nation in one great throbbing ery call to their aid the Great Physician of soul and body, and throw round about that sick man's chamber the healthgiving atmosphere of a Nation's prayer.

"The effectual fervent prayer of a righteous man availeth much." The carnest importunate ery from a Nation's heart, "Oh, God, save him?" availeth more.

A UNIVERSAL SUPPLICATION.

To the Editor of The Tribune. SIR: The action of a religious body, as reported a day or two ago, recommending special prayers in behalf of our desperately wounded President, is very good so far as it goes; but does it not seem as if all State and ecclesiastical authorities together ought at once to agree upon and appoint a day of humiliation and prayer -when thoughout the land all our people shall assemble in their respective places of worship and most solemnly implore the great and good God of His most abundant mercy to spare our beloved President, and this Nation, which he has redeemed and led so bie-seedly hitherto? "We know," as the Episcopal Prayer Book says, "that there is no word impossible with God, and that if He will, He can even yet raise our Chief Magistrate up, and grant him a longer continuance amongst us, to be an instrument of God's glory and to do good in his generation."

By so joining together in special, most urgent suppli-cation, we shall show—both to God and to men—that we are really one people, and that even our religious dif-ferences may not mar the blessed unity of our fraternal love.

PRAYERS FOR THE PRESIDENT.

To the Editor of The Tribune. Sir: While I would not have the surgeons and others in charge of President Garfield omit a single act which, in their judgment, is necessary, it has become evident to me that, if he recovers at all it must be by special intervention of the power of God. When the President was first smitten the Christians of the nation betook themselves to prayer. For several days they prayed with an unanimity never before witnessed. The Lord heard them, as I believe and the President made good progress toward recovery. But, latterly, this tide of prayer has been unwisely checked and the volume of supplication has been lessened. It seems that the relapses which President Gardield has suffered of late should teach the obvious lesson of duty to offer more and better prayer. Let all who can pray John in supplies ion. Let it be done with faith and fervor, and He who has assured us that "the prayer of faith shall save the sick," may yet in mercy spare him whom we all love.

KEEP ON PRAYING.

To the Editor of The Tribune. SIR: When first our beloved President was stricken, with one accord every heart's cry to the Giver of All seemed to be, "God spare our ruler's life." That prayer was answered. Let every Christian heart, with remitted faith, now plead for perfect restoration, for "in God we trust."

She said that they might have gone to friends in Hartford, but she thought that if they were saved they would have telegraphed to her.

A dispatch received at the office of the Coast Wrecking Company stated that the steamer was not damaged as much as was expected, and it was thought that the hole in the bottom could be filled so that the water could be pumped out. The vessel is in about twelve feet of water and is resting on a bank of clay. A quantity of baggage taken from the steamer arrived at the pier in this city last night.

Hartford, Conn., Aug. 39.-Wreckers began work on the partly-sanken steamer State of New-York to-day, and the body of Baggage-master Sellew was recovered by the divers. The steamer appears to be breaking near the stern owing to the strain from the bow resting on the bank. The stern has sunk three feet

REDEMPTION OF BONDS.

Washington, Aug. 30 .- At the close of business to-day there had been surrendered to the Treasury Department for payment \$4,674,250 of 5 per cent bonds embraced in the 103d call, and \$954,350 registered coupon bonds which were covered by the 104th call.

The statement having been made that a call for bonds would be issued by Secretary Windom to-day, that gentleman was applied to for information on the subject. The Secretary said that there had as yet been no decision to issue a call for bonds, and consequently it decision to issue a call for bonds, and consequently it could not be said what bonds would next be called, when a call would be issued, or what amount would be embraced. These questions, however, the Secretary admitted, would have to be met sooner or later. There are no bonds which could be called except the continued is and 6s, but considerable interest is manifested in the question as to which series of the bonds continued at 3½ per cent will be called first.

It is estimated by those familiar with the operations of the Treasury Department that the debt statement for the month of August will show a reduction of about \$14,000,000.

SPECIAL INJUNCTION GRANTED

PHILADELPHIA, Aug. 30.-Judge Butler, of the United States Circuit Court, this morning sat in the case of Samuel D. Karns and George C. Howe against the Potomac, Fredericksburg and Piedmont Railroad Company and others. Karns and Howe claimed to be ereditors of the road to the extent of about \$135,000, which they had expended in the furtherance of a \$1.000,000 contract to complete the building of the road from Fredericksburg to Orange Court House.

Having heard that a sale of the road was to be made to

the Atlantic and Ohio Railroad by L. Harvey Richards, 1,500 excursionists from Peekskill, N. Y., her regular trips between the Ocean Pier and New-York being run by the steamer Taurus, of the Iron Steamship Company. The Taurus and Plymouth Rock were loaded on both trips.

SECRETARY BLAINE TO MINISTER LOWELL. Washington, Aug. 30.-The following was sent this afternoon:

this afternoon:
Lowell, Minister, London.

The President's condition has not materially changed since my last dispatch. Another incision was made this morning in the parotid gland, with very satisfactory results. Pus flows freely and the swelling grows less. The pulse at this hour—2 p. m.—is lower than during the forenoon of yesterday. But on both days it has been higher than his other good symptoms would seem to warrant. It is now 110. At noon it was 116.

BLAINE, Secretary.

The following was sent by Secretary Blaine at 10 o'clock this evening:

To Lowell, Minister, London.

The President, if not rapidly advancing, is at least holding his own. His fever is less than last night and his swoilen gland steadily improves. His pulse continues rather high, running this evening from 110 to 114. Perhaps the best indication in the ease, is, that the President himself feels better, and, his mind being now perfectly clear, he readily compares one day's progress with another.

Boynton, Mrs. Garfield's physician, said to a reporter:

"Were it not for the advent of septicemia in the President's case he would now be convalescent. The stomach trouble of two weeks ago, the glandular complication, the super and desirium, the rapid pulse, loss of strength, etc., were all due to this cause. The wonderful vitality of the President enabled him to overcome all of the dangers and complications attending the wound prior to the occurrence of blood poisoning. In his case septicemia had undermined the very foundations of life, producing a condition much resembling typhoid fever, attended with stapor, delirium, and great prostration. The processes of digestion and assimilation had been pretty much arrested, so that, although he parterly, of a smilling typical transport of the processor of the committee and the desired with stapor, delirium, and great prostration. The processes of digestion and assimilation had been pretty much arrested, so that, although he parterly, and the question of his resignation last night.

Reprotent her vote cast at the bast election. much arrested, so that, although he partook of a sufficient amount of nutritions food, he became greatly emaciated and exhausted, The blood, tesides being vitiated by the absorption of septic matter, had become more and more depraved on account of the failure of the system to assimilate food and transform it into blood. The President has been laboring under the influence of the blood poison for some time, and during the past week it became evident that unless a favorable change soon occurred his vital powers would give wa ."

"On Friday morning a change for the better was noticeable, the first indication of it being an abatement of the stupor and delirium. This was followed by the appearance of other favorable symptoms, which indicated that the blood poison was being eliminated, and that the system was making an saturday it was more a struggle with exhaustion, the cause of the exhaustion having, to some extent, been removed, while on the preceding days the exhaustion was nearly as great with no apparent abatement of the cause. If the blood poison continues to be eliminated as do no more septic matters are absorbed, the President will slowly but surely regain his strength. In his present condition it is not impossible that there may be further absorption of septic matters bringing with it serious concomplications, but it is confidently hoped that such will not be the case. No irreparable mischief has occurred to any of the vital organs and recovery is more than probable. As the processes of digestion and assimilation become more fully reestablished, better blood will be manifactured from the food, which as it circulates through the system will stimulate to more healthy action all the functions of the body. The process of repair in the wound which is now at a complete standstill will be reestablished; the discharge of pus which has almost ceased, will again become normal as to quantity and quality; granulations will spring up and the wound will rapidly heal."

NOT AN EVIDENCE OF PYÆMIA.

Dr. F. H. Hamilton left this city by the 3:40 p. m. train yesterday for Washington, where he will probably remain until Saturday. Before going he clined to talk of the President's case, as he said that he had nothing further to communicate. But just as the reporter was taking his leave, Dr. Hamilton said:

ought to be said. I see it stated by a gentleman ture, may be expected with the William to the said. The it stated by a gentleman ture, may be expected to day in this city and vicinity. connected with the White House-not one of the council-that one of the evidences that the patient is now laboring under pyæmia is found in the fact is now laboring under pyzemia is found in the fact that there was a crop of pustules upon his back. A part of your readers who belong to the medical pro-fession will understand me when I say that this was simple acne, or acne simplex, which presented itself about two weeks ago at a few points in the lower part of the back, and which was due simply to the fact that the President was resting upon that part of his back. They were washed carefully a lew times with soap and water, and they speedily disappeared."

DR. HAMMOND'S PRESENT BELIEF. Dr. William A. Hammond, speaking of the condition of the President yesterday in conversation with a Tribune reporter, said that as soon as the fever went down he would feel very much encouraged.

"This subsidence of the fever," he continued,

"would be shown by the pulse decreasing every
day a little. But I fear that the present improvement is due to the improvement in the passifi
gland. I want to deny the statement that has been
credited to me in effect that I said that the President was going to die and that I only gave him
three days. I never said that he was going to die
—much less fixed the time—but simply have said
that the chances were against him. Yes, I still
think he is suffering from pyæmia, but sometimes
patients recover from that." went down he would feel very much encouraged.

INTEREST SHOWN IN NEW-YORK. There was not much diminution in the interest shown in this city yesterday over the condition of the President, but the excitement has largely decreased. There was a more hopeful feeling everywhere manifested, though it is coupled with a fear

where manifested, though it is coupled with a lear that bad news may come at any hour. At the Fifth Avenue Hotel last night crowds surrounded the bul-letins as usual.

Vice President Arthur remained in the city all day. A friend said last night, however, that the Vice-President was talking of going to Long Branch to-day for a few days' rest if the President continued improving.

BRINGING A MESSAGE OF SYMPATHY. San Francisco, Aug. 31.—Among the passengers on the steamer Grenada, which arrived here last Saturday, was the Hon. L. Montufar, special convoy of President Barros and the Republic of Guatemala to convey to Washington a message of sympathy and condolence to President Garfield.

THE REPUBLICAN STATE COMMITTEE.

ITS MEETING AT THE FIFTH AVENUE HOTEL TO-DAY -SEPTEMBER 28 PROBABLY TO BE FIXED AS THE DATE OF THE CONVENTION.

The Republican State Committee will meet at the Fifth Avenue Hotel at noon to-day, to decide upon the time and place for holding the State Convention, and to transact such other business as may be brought before it. Few members of the committee from outside of this city and Brooklyn were in the city last night. A good many will be represented by proxies. Mr. Johnson, of Oneonta, who is a member of the committee and also one of its secretaries, was at the Fifth Avenue Hotel last night, making preparations for the meeting to-day. John F. Smyth and Postmester Craig, of Albany; Thomas C. Platt, of Owego; Bernard Bigliu, Michael W. Burns, Charles Blackie, Special Agent Griffiths and a few others were at the Fifth Avenue Hotel last night, where Mr. Conkling has his rooms. Charles Blackie, M. W. Burns and other members of the committee said they had called to ascertain what action would be taken to-day, as they had heard nothing so far. It seemed to be accepted as a settled fact that the Convention will be held in Saratoga on September 28, although there is some talk of an earlier date.

It was also reported last night that Vice-President Arthur, who is chairman of the committee, will resign that office to-day and allow some other person to be selected to the prace. John F. Smyth was mentioned as the Vice-President's choice for his successor. Other names are also mentioned for the place. Mr Conkling is said to be anxious that the Vice-President should retain A TALK WITH DR. BOYNTON.

VERY HOT WEATHER IN THE WEST.

Lansing, Mich., August 29 .- Mrs. Curren, of this city was sun-struck to-day and died in fifteen minutes. Yesterday and to day were the hottest of the season, the mercury reaching 102° in the shade. DECATUR, Ill. Aug. 29 .- A serious water famine is threatened in this region. Doleful reports of the in-creasing scarcity of water come all parts of the county. Stock is suffering.

BERRIEN SPRINGS, Mich., Aug 29.—The weather is very dry and warm, the mercury running up to 1000 yesterday Gibson, Ill., Aug. 29.-The weather here is frightful.

The dust lies from two to four inches deep, which gusts of wind whirl everywhere, almost impeding business. Scarcely a drop of rain has fallen since the middle of June. The fields appear as if a sirocco had passed over them. There is absolutely no pasturage. Fall plowing is out of thequestion. Most of the wells are dry.

MAIL BAGS IN ABUNDANCE.

Washington, Aug. 30.—Postmaster Pearson, of New-York, reports that in consequence of the re-turn of American mail bags from Canada, he now has at his office an accumulation so great that he finds it diffi-cuft to store them. Heretofore it has been necessary to purchase about ten thousand bags a mouth to supply the New-York office, which is the heart of the chronisting system of the department. It is believed that it will not be necessary to purchase any new bags for several reports.

THE HURRICANE OF SATURDAY.

GREAT DESTRUCTION AT AND NEAR SAVANNAH-SEVERAL CASUALTIES-THE STEAMER CITY OF SAN ANTONIO FORCED TO PUT INTO PORT-COURSE OF THE HURRICANE.

SAVANNAH, Ga., Aug. 30.-The hurricane which visited this city and vicinity on Saturday evening was very destructive. The rain fell in torrents. Houses were Shafer's saw-mill at Dallas, Penn., and 150,000 feet of paroofed and sluiced, stores and warehouses flooded, and the streets littered with debris and prostrated trees. The shipping on the river was torn loose and thrown on

the banks and there were innumerable collisions.

Vessels are ashore all down the river to Tybee. At
Tybee great destruction was wrought. The Ocean House escaped, but most of the cottages were blown down or injured. Mrs. Wolf and daughter, Mrs. Z. Faik, her little girl and her young brother, Joshus Falk, were burned to death. The whari and transway were destroyed. The solourners on Tybee Island were in terrible peril all No estimate can as and a solourners.

night long.

No estimate can as yet be formed of the damage in this city. A number of accidents occurred some of them fatal. The steamship Dessone, which all here Thursday for New-York, returned last evening in a disabled condition. A number of wreeks are reported along the coast. The revenue cutter foutwell is in the marsh back of Fort Pulnski, and a number of other vessels are ashore in the vicinity of Tybes.

Later—it is estimated that over 100 lives have been lost in this vicinity by the gale. Between twenty and thirty impress have already been heid. With the exception of seven all the bodies are those of negroes washed off the plantations.

Every arrival continues to bring accounts of disasters by the storm. The steamer Junian, from New York, which arrived to-day, break down at 5 p. m. on the 28th inst. She brought the erew of the schooner Hammah M. Sollis, bound from Jacksonville to New-York with lumber, which she took off on the 28th inst. The captain of the schooner was nost overboard.

incr., which she took off on the 28th inst. The capitaln of the schooner was not overboard.

James G. Harris, mate of the schooner Mary G. Fisher, which sailed from Philadelphia for Wilmington, N. C., laden with coal, was picked up at sea on the 29th by the steamer Santiago de Cuba, and brought to this port. He was on a piece of the cabin of the schooner, and was maked and delirious when picked up. The schooner is offered to the schooner of the schooner of the cabin of the Schooner.

PORT ROYAL, S. C., Aug. 30.—Captain Hines, of the steamer Western Texas, reports the Martin's Industry Lightship gone, and all the buoys to Port Royal shifted.

Washington, Aug. 30, 10 a.m.—The Chief Signal Officer of the army furnishes the following special builetin: "The hurricane which entered the South Atlautic States

The hurricane which entered the South Atlantic States Saturday morning, after moving in a northwesterly track to Iowa, has since midnight began to recurve to the northeast. While it still remains a storm of considerable energy, it has lost the violence which attended the earlier parts of its path."

earlier parts of its path."

FERNANDINA, Fla., Aug. 30.—Mallory's steamer, City of San Antonio, put into this port last night to clear her discharge and blige pumps and fasten down the after boiler. In the storm of the 27th instant the iron shutters were stove in and the saloon flooded from aft to bulkhead. She will make the necessary repairs and proceed to Galveston at once. Captain Burrows reports that the storm was the most terrific he has ever experienced.

A CYCLONE MOVING NORTHWARD. HAVANA, Aug. 30.—A dispatch received here yesterday ounces that a cyclone has visited the islands of Bar badoes and Martinique. It is supposed that it will reach the southern and eastern coasts of Cuba by the first or second of September.

EXCITING SCENE ON A RAILROAD TRAIN. THE ATTEMPT TO ARREST TWO BURGLARS AT ME-

CHANICSVILLE, N. Y., RESULTING IN THE SHOOT-ING OF FOUR MEN-THE TRIEVES SECURED, WHITEHALL, N. Y., Aug. 30 .- The dwelling houses of H. A. Griswold and A. C. Hopson were entered by burglars last night, and property valued at more than \$2,000 was taken. Two men boarded a south-bound train at Constock's, seven miles distant, at seven o'clock, and an order was telegraphed for their arrest at Mechanies-ville. Two officers who attempted to arrest them there were shot, and it is feared that one of the officers is fatally wounded. The stolen property, consisting of six-verware, jewelry, watches, etc., was found on the train.

ALBANY, Aug. 30.-The train from the north on the Delaware and Hudson Canal Company's Railgoad, which reaches this city at 9:35 a. m., was the scene
of one of the most exciting incidents that ever occurred
in railway traveiling. When the train reached C m
stocks it was boarded by two men, who are supposed to
be members of what is known in police circles as the
"Frawley and Magee" gang of burgiars. They are the
ones who are believed to have robbed Schwartz's pork
store in this city a few menths ago. They are also supposed to have committed a robbery at Hague last week.
Their last criminal transaction, so far as known, was
robbing the house of H. A. Grisvold, of Whitehall, of
jeweiry, plate, etc. Early this merming a telegram was
received by Chief Malloy, saying that the men had taken
the train at Comstocks, after buying tickets for Albany.
The Chief was, therefore, prepared to receive them
should they reach this city, but they didn't arrive here.
A similar telegram was sent to beputy Sheriff Post, of
Saratoga County, and, when the tra'n reached Mechanics
ville, he, with one assistant, entered the car where they
were. It was crowded with passengers, who had no idea
who was with them or what was to happen. Post is a
large man and anything but a coward, as the result will
show. He walked up to one of the men and deliberately
collections of uneral hereafter.

It was reported that the body of Sidney Sellew, the baggagemaster, had been found in the posson. The Fresident will but at the news would have been sent to him if it were true. Oscar B. Smith, one of the passengers that the true of the cause of the exhibition was nearly as great with no apparent stated yesterday that a woman and her baby were drowned, but many of the passengers declare that they saw the woman and child picked up by the deckhands. Mrs. Otis, of White Plains said as a strength. In his present condition it is not impossible that there may be further absorppulled the ticket out of his hat to see whether it read "Albany" or not. The man knew or suspected who Post "Miller, p., son of William A. and Mary Jame Miller, it am A. Miller, p., son of William A. and Mary Jame Miller,

pulled the ticket out of his hat to see whether it read "Albany" or not. The man knew or suspected who Post was, and forthewith drew a revolver and fired, inflicting an ugly wound in the neck. Post quictly returned the compliment, amid the widest excitement of the passengers, and hit the man in the forehead. Meanwhile his companion had fled from the loss of blood. Post pounced upon him, and, forgetting his duty as an officer, began beating him is such a manner that the bystanders thought he would kill him had they not been separated. The companion, while running, was shor in the reck with a masket by a farmer and surrendered at discretion. Both prisoners were taken to ballston and lotged in Jall. The property taken at Whitehail was all recovered, and is said to be valued at \$2,000.

A dispatch from Mechanicsville says the names given by the criminals are Lewis Proeter and John Murray. Officer Post was wounded in the breast very slightly and in the breek not dangerously. J. K. Farnum, a citizen, was wounded. The ball entered the lower end of the shoulder-blade and was cut out by Dr. Keefe. The wound is not scrious. Proctor, one of the burglars, was shot in the back of the neck, not fatally. There is talk of lynching both burglars. One of the prisoners said to a reporter that if his paper circulated in Texas he would like him to publish the fact that Proctor and his brison was a giant. His shoulders were broad and he was about six feet tall and between thirty and thirty-flye years of age.

WESTWARD BOUND CANAL FREIGHTS.

THE CANAL BOARD RESOLVES NOT TO REIMPOSE THEM.

ALBANY, Aug. 30 .- At a meeting of the Canal Board, to-day, Superintendent Dutcher and Controller Wadsworth submitted the following report on the proposition to reimpose the tolls on westward bound freight on the causle :

on the camals:

The receipts of tolls for the fiscal year ending August 22, 1880, were \$1,126,114 II. The receipts of tolls for the present year to August 22, 1881, were \$776,904 58. The receipts from the opening of navigation until August 1879, were \$421,914 II; in 1880, \$649,884 62; in 1881, \$331,286 22. The expenditures for the next fiscal year must not exceed the receipts of the present year, and while the amount will not be sufficient to do all that is desired, there exists no doubt in the minds of your committee that the amount will be sufficient to secure as good navigation as there has ever been. Since the adoption of the resolution there have been slight improvements in freights by the canal, and the injury to some portions of European grain crops promises a better foreign demand for our surblus oreadstaffs. Shippers eign demand for our surplus breadstuffs. Shippers inform your committee that a larce portion of the westward bound freight for the present casendar year is now under contract, and the reimposine of toils would be very injurious to other interests. The season thus far has been very unrenumerative to boatmen, and in view of that fact and the improved prospects of business by caual, the injury to those engaged in transportation, before referred to, also the further fact that the Department will offer through the next Legislature to submitted the people one of the constitutional amendments already adopted by the Legislature, which will be in time to provide for any emergency that may be caused by deficiency in the revenues during the next fiscal year, your committee do not recommend any reimposition of toils on west bound freight for the present season.

The report was accepted and the recommendations The report was accepted and the recommendations
